

Skyebot Contact Parser

Skyesoft™ Information Sheet

September 13, 2025 – Created by Skyesoft™

Purpose

Parses email signatures to detect structured contact data and prevent duplicates in entity/location/contact logic.

Logic

- Detect name, title, phones, company, address
- Check for existing records
- Add only new entity/location/contact as needed
- Fetch Google Maps data

Outputs

Structured contact block added to `skyesoft-data.json`
