

One Line Task (OLT) Input Recognition

Skypesoft™ Information Sheet

October 5, 2025, 7:50 AM MST – Created by Steve Skye

Purpose

Converts plain-text user prompts into structured, context-aware system actions (create, update, notify).

Core Logic

- Entity + date detection via NLP
- Intent classification (quote, contact, permit, task)
- AI suggestion feedback if ambiguous

Examples

Input	Recognized Action
Jim Flanigan at ALC Group, 816-421-8335	Add new contact
Schedule reinstall for Yogurtology next Wednesday at noon	Create task
Sign permit follow-up, call Louie	Create call reminder

Integration

- Semantic Responder
- Permit Management Suite
- Attendance & Escalation Trees
- Time Interval Standards

Objective

Empower natural language control over Skypesoft without relying on menu navigation or rigid commands.
