🎯 Purpose

Produce internal knowledge documents that summarize Codex modules, standards, and rules. These sheets guide developers and AI in aligning with the Skyesoft Constitution and explaining it to users.

💡 Use Cases

• Developer references for module specifications
• AI explanations of Codex content to users
• Validation of workflows against constitutional standards

📁 Type: Codex Documents

Purpose: Summarize the integrated legacy markdown documents that form part of the Constitution.

Required Fields:
- Mandatory: topic
- Optional:

Pipeline:
- Lookup section in codex.json
- Format title + summary
- Render list of included items
- Attach disclaimers (e.g., static snapshot, not dynamic SSE)

Outputs:
- title
- summary
- documentList
- disclaimers

📁 Type: Module Overview

Purpose: Generate a structured summary of a Codex module (e.g., Permit Suite, Time Interval Standards).

Required Fields:
- Mandatory: module
- Optional:

Pipeline:
- Fetch module entry from codex.json
- Render title, purpose, features, integrations
- Attach disclaimers (e.g., simplified summary, check full spec)

Outputs:
- moduleName
- purpose
- features
- integrations
- disclaimers
